

What is Government 3.0?

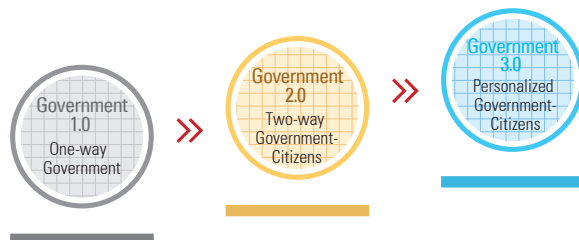

Government 3.0 is a new paradigm for government operation to promote active sharing of public information and removal of barriers existing among government ministries for better collaboration. The ultimate goal is to provide customized services for individual citizens, generate more jobs and support creative economy.

[Korea, a nation with hope and happiness]

"I will earn the trust of the people by ensuring that our government remains clean, transparent and competent."

- Presidential Inaugural Address (25 February 2013)

"A new beginning filled with the hopes and dreams of the people. Preparing a better tomorrow for each individual. Bringing more happiness to the people and making Korea a stronger nation. We will create a new era of hope through Government 3.0."

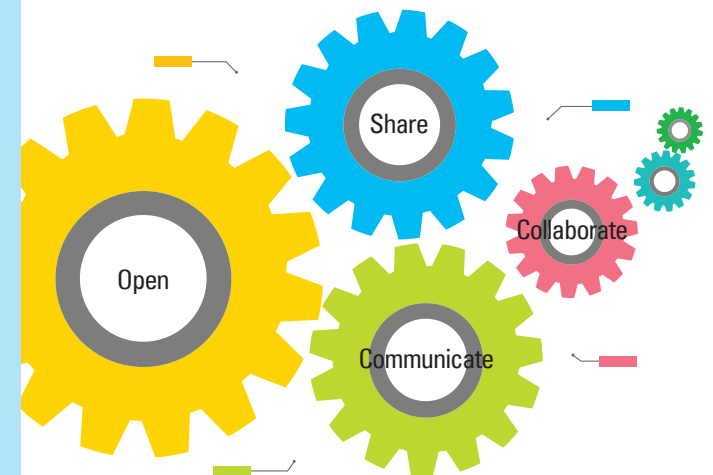

A new era of hope and happiness

The Government of the Republic of Korea

Toward a New Era of Prosperous Korea

Government 3.0

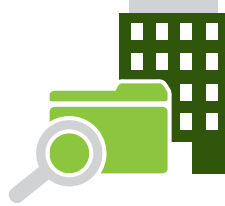

[Open · Share · Communicate · Collaborate]

Transparent Government

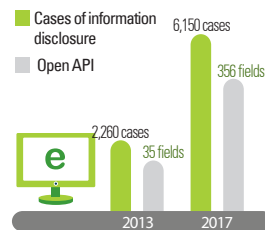

Keeping the public well-informed on government affairs

Disclosure of information that affects the daily lives of the people in advance.

Greater disclosure on Government raw data

Ensuring extensive use of information by gradually opening the data with high demand for disclosure and significant economic impact.

A government that works with its citizens

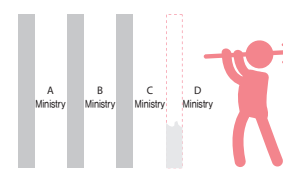

Expanding citizen participation and providing diverse communication channels for collaboration.

Competent Government

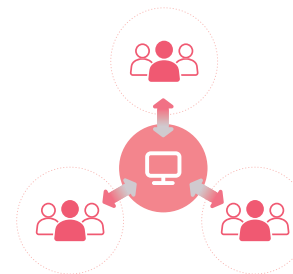

Collaboration through eliminating barriers between government ministries

Creating a Government that brings results by changing its working structures from organization-base to task-base.

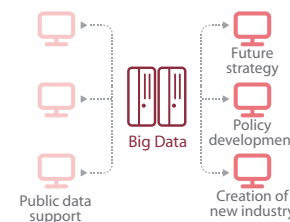

More efficient government

Efficient and rational decision making through information sharing among ministries.

Scientific administration

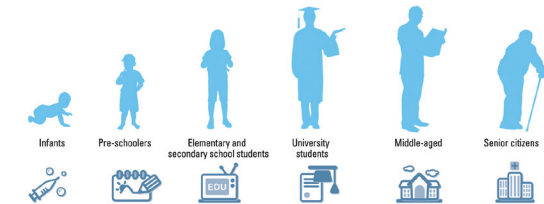

Policy tasks identified through various data analysis for the formulation of the nation's future strategic plan.

Service-oriented Government

Provision of customized services

Upgrading administrative systems to provide citizens with different types of services through a single request.

Helping Small and Medium-Sized Businesses (SMEs)

Integrated management system to be created by business characteristics in order to provide prompt services for SMEs.

Face-to-face contact with people in need

Expanding contact points for civil service affairs to improve the welfare services for socially disadvantaged groups.

Creating a Smart Government with the use of IT

Providing mobile services utilizing smart information technology for service areas that are closely related to people's daily lives.
